

VOL. III, NO. 29.

(Forecast—Pleasant and Warm.)

EDMONTON, ALBERTA, TUESDAY MORNING, JUNE 4, 1912

PRICE FIVE CENTS

HEAR REPORTS ON COLLEGES

Methodist Conference Learns of Progress at Alberta and Mount Royal Institutions.

THE SESSIONS COME TO AN END TONIGHT

Work Being Completed on the Final Draft of the Station Sheet.

Reports of committees were the order of the day at the Methodist conference held at Edmonton. In all, reports from the two denominational colleges were received and adopted by the conference, and later the reports of the Sunday school and Evangelical League were also presented. The session was read at a successful young people's rally held in the church in the evening, at which an address was given by the Rev. Dr. Hartley, general secretary of the Canadian Council of Christian Leaders in the different departments of the church.

The stationing committee had a long sitting last night, but the draft of the station sheet was still incomplete at a late hour.

It is the closing day of the conference, and the final committee will take up most of the time to complete the work.

The evening conference will be a missionary meeting, at which address will be given by the Rev. A. C. Farrell, president of the Board of Foreign Missions, and the Rev. Dr. Hartley, superintendent of the Methodist high schools and hospitals in Canada.

The report of the Alberta College was read by Dr. Hiddle. The report of the board of directors in order to carry out the work of the school has divided in two sections, one for the first year students and the other for the second year students on the north side and those confined to commercial studies, music, drama, and art.

The second division was carried on the south side, and the other departments, the presbyterian and theological, the practical work of the college and the work of the probationer in such studies as were prescribed by the general conference.

During the year 165 students were registered in Alberta College on the South side, and 150 on the North side. In the University was 176. Of these eighty came from Methodist homes, one hundred and twenty-four from others, seven were from the Alberta College. Of the eight scholarships offered for the year, six were given to students of Alberta College. The affiliation with the University offered many opportunities for the making of college work, and the board was making extensive plans for the erecting of a new building for the department of a high grade of advanced work to the departments which pertained to law and medicine.

The bursar's report for the year shows the total fees were \$22,361, while the expenditure for the year was \$23,771, leaving a deficit of \$560.

The work on the north side of the river was progressing rapidly, and the prosperity, the total enrollment up to 1912 being 1,000, the report stated in conclusion that the school had made good progress, and that the number of students had practically outgrown the capacity of the present building, and an admirably equipped hall had been erected for the erection of a new institution.

Montreal Royal College.

Principal Kinnaird, of the rector of Mount Royal College, Calgary, reported at the conference that the number of students had increased from 120 in the first term of September 12, 1911, and during the year the total enrollment had increased to 1,000, of which 112 were in the medical department.

The students were several young men who are looking forward to the ministry as their life work, and that the school had been well received by the public.

Mount Royal College will furnish its students to year a number of prominent universities.

"Our present building," the report continued, "which was opened in 1911, is well equipped and equipped in the most up-to-date manner, having in view the comfort of the students, and the desire to provide a properly furnished college. The buildings have already been taken to the roof, and some extensions are now being carried out, and others are yet to be completed for the next year."

A sum of nearly \$10,000 was contributed by the public for the building, and during the year to the end of June, the amount contributed was \$1,000.

The building is the best in the city. It contains the Seraglio, the principal hall, the library, the lecture room, the lathe, the public office of the government, and the existing remains of Constantine.

Akbar Khan, the former sultan of

manent buildings prepared before the end of September.

In the meantime an effort was being made to raise the money in subscriptions sufficient to erect the remaining portion of the permanent building, and the amount of money necessary had already been promised.

The present financial position showed a balance of \$10,000, and money subscribed approximately \$225,000, making a total of \$325,000.

Present facilities were approximately amounted to \$46,250, the total receipts

for the year being \$1,000, the "traveling expenses."

For the same period

the amount of money of something over \$2,000 was expended.

Work of Sunday Schools.

The Sunday school committee reported a marked increase in all items.

The membership was over 18 per cent for the year or a total of one thousand five hundred and

two thousand five hundred and

one thousand.

During the past year many of the 82 schools have united with the larger schools, and the smaller ones have been observed in any of the schools.

Believing that the best results in the work of the schools could be obtained under efficient leadership, the committee recommended the holding of a school in each district within the boundaries of the city, and the best educational methods, and another in either as near to the school as possible.

They further recommended that each school be provided with a library of current books for the purpose of increasing the knowledge of the students.

This knowledge has stiffened the backs of the youth and their confidence in their ability to compete to succeed, and they refused to entertain the government's proposal.

The committee recommended that each school be provided with a library of current books for the purpose of increasing the knowledge of the students.

On the other hand, the strike leaders assert that 5,000 men were employed to break the strike, and the strike was broken.

The strike leaders said that the men at work at the docks have been

paid off, and by the shipping companies are paid, so that the strike has not been broken.

Charles Tupper in Vancouver.

Vancouver, June 3.—"I am feeling very well, and I expect to be home soon to be myself again," said

Mr. Charles Tupper on his arrival here yesterday. "I am taking a short trip and I will be back home in time for the annual meeting of the Royal Canadian Legion.

Montreal Royal College.

Couc d'Alene, Idaho, June 3.—The Democratic state convention today elected a new state chairman, and the delegation to the national convention for Champ Clark.

Montreal MacLean Wins a narrow Escape; Starts a Thrilling Race.

The Amount of Dynamite Which Exploded Was Fifty Pounds.

Kingston, Ontario, June 3.—A verdict of accident, with cause unknown, was given yesterday in the case of Mr. Munro, the accident at the construction camp of the Canadian Northern Railway at Lake Opinicon, in which eight men were killed and six injured. The coroner's inquest was adjourned.

Montreal, June 3.—John MacLean, who had a narrow escape from death, was carried to Prescott, Northrop, the morning after he was shot in the head, and his staff, composed of Ade de Cade Capt. Mackenzie, Colonel Belcher, Major R. D. Arthur, and Major G. L. MacLean, commanding officer of the 19th Alberta Dragoons and a squadron of the 19th Alberta Dragoons and a squadron of the boy scouts.

The coroner was the review of the troops by Lieutenant General Sir George Grey, on his forty-seventh birthday. His Royal Highness King George the Fifth, the Duke of Connaught, and the Duke of York, and their staff, composed of Ade de Cade Capt. Mackenzie, Colonel Belcher, Major R. D. Arthur, and Major G. L. MacLean, commanding officer of the 19th Alberta Dragoons and a squadron of the boy scouts.

It may have been that a piece of dynamite exploded in the hands of one of the workmen, Northrop said.

He was an experienced man in the business and always careful.

The chief constable was given by Dr. C. C. McLean, who was present at the scene of the accident, told a story of a man's valiant escape. A man standing fifty feet away from him was instantaneously killed, and the explosion sent a series of small stones. His story of the grounds and trees for the work of dynamite was well known.

The coroner said that the explosion

was most appalling.

JOHN HOWEY, C. F. HAYES,
MANAGER, EDITOR, BUSINESS MANAGER.

WEDNESDAY, JUNE 4, 1912

Many happy returns.

Governor Hinckley of Indiana says Col. Roosevelt is a bougher. That may be, but the way he has run his nominating campaign doesn't prove it.

Hon. Mr. Pelletier is in such poor health that he finds a holiday necessary. Firing dead post-masters must be as Mr. Foster says, a "darnable" job.

Their electric lighting system has been installed in the homes. Mass. Jaw have set their shoddy ahead an hour, and are using the daylight for business and the night for sleeping. There are no reports yet as to how they like the change.

The Winnipeg Telegram argues that the Canadian Government is at war, and tries to prove it by saying that financiers have made fortunes by starting wars. Money rule, the Telegram thinks, is the rule that does not work both ways.

The Italian Premier says Italy will have an entente with Turkey before the end of July. Coming to an early end, it Italy can plan some emergency measures which would not bring the bigger European nations into the fight lines if it was not so sudden. If there were adopted, the war with Turkey is not likely much longer than the present one. It is a good deal of money and if the present methods are adhered to, it seems likely to last indefinitely.

Col. Sam Hughes says more Canadian boys learn to drink in than at Simonds' training camps than at militia training camps. This comes from a responsible quantity of men, who are not schoolmen, and it can hardly have been prompted by any wish to do them good. Coming from Col. Hughes, however, it may be put down as another of the wild utterances which have won for the Mount-Eat Militia a reputation for starting his mouth going and forgetting to stop it.

Five Dominion bye-elections are to be held soon. One seat was vacated by the outcome of an election trial. The other four were vacated by their incumbents being appointed to partnerships, commissionships, or other posts through the political influence of persons in the party. The appointment of members of Parliament to salaried posts under the Government is a practice which the present Premier and his colleagues used to roundly denounce when they occupied the seats across the chamber. In power they seem no more disposed to practice what they have preached in this regard than in other matters.

A lumber company is suing the Dominion Government to recover the amount of duty charged them on a car of lumber such as came in duty free under the former Government. The suit has not been heard by the Supreme Court of Canada and the decision will be of considerable interest. The case arises out of the difference of interpretation put upon a clause in the lumber tariff by the former and the present Governments. Under the former Government the company was given the benefit of the doubt and the lumber allowed to enter free of duty. Under the present Ministers this ruling will be reversed and the importer will be charged 25 percent of the value of the lumber to get it across the line. The king company challenges the correctness of this interpretation put upon the clause by the present Ministers, and ask

that their money be returned. It is to be hoped they get it.

Sir Rudolph Forget has suggested a merger of the steamship interests of the St. Lawrence and the Maritime Provinces. This is not by any means his first offering in the merger-making line. Sir John Galt, in 1867, proposed to Sir James Grant the knight of the marshes who had fortune for themselves with money for which they have given no service but the irresponsible use of money. These in Canada and their kind elsewhere have extinguished the era of competition, and replaced it by an era of combination without restraint or punishment. This change in the whole aim and complexion of the business system of the country demands an extension of the regulatory powers of the Government in directions and to lengths unthought of and unnecessary when you consider the original regulatory force for the prevention of price-boasting and the other abuses common to monopolies. Unfortunately, however, the knightly gentlemen who own the mergers also own the Government, and the prospect of their operations or disoperations being kept in hand by a suitable exercise of the Government's power to regulate is not very good.

NATIONAL COUNCIL TO DIRECT Y.M.C.A. WORK

Convention Meeting in Winnipeg—Association to Spread Y. M. C. A. Movement to Towns and Villages

Winnipeg, June 3.—The convention of the Young Men's Christian Association of Canada devoted its greater portion to the discussion of the industrial future to the command and creation and drafting of legislation.

But association will be known as the National Y. M. C. A. and each unit

shall be entitled to representation in the international convention.

It was agreed,

but tie especially to the next three years and the basis of the previous years experience as a review of a ministerial report on the condition of the City, and have always been closely in touch with municipal affairs.

I am the representative of the Department of Political Science of the University of Western Ontario, and especially to deal with questions of national and international politics and all similar problems generally.

I am the representative of the

platform except the broad platform of the best interest of the country.

And every circumstance with regard to myself and my constituents

with regard to myself and my constituents</p

GROUARD

Concrete Facts Concerning Grouard

Situated at the West end of Lesser Slave Lake in the Peace River District. A town with a population of 1200 or over. Few people realize the importance of the assertion that Grouard is destined to become a city is beyond the slightest shadow of a doubt. All it requires is the Railway and then the average investor will realize that he has neglected the

opportunity of buying property while the price was within his reach. To prove to you that the railways are going to Grouard we publish herewith extract from an Act to authorize the guarantee of certain Securities of the Canadian Northern Western Railway Company. Assented to Feb. 16, 1912. Chapter 19.

"From a point on the authorized line of the Canadian Northern Railway at the town of Athabasca Landing; thence in a north-westerly direction on the north side of the Athabasca River to Lesser Slave Lake; thence on the north side of Lesser Slave to a point at the village of GROUARD, and thence to a point on Peace River at Peace River Landing."

"McArthur Line—A line of railway from Edmonton through Dunvegan—the western boundary of the province running south of Lesser Slave Lake."

One hundred dollars invested in Grouard today would represent in one year as much percentage as three hundred dollars invested in Edmonton city property. Shrewd men recognizing Grouard as the most important trading point in the Peace River district have invested in property and developed the town. Until today without the assistance of railroads, Grouard has become the first and largest trading centre in the Last Best West. Three of the largest Trading Companies have located there; The Revillion Bros., Hudson Bay and Peace River Land and Trading Co., and many large and important concerns. There are Hospitals, Doctors Drug Stores, Solicitors, Two Chartered Banks doing business in Grouard, and many others have bought property. Government Telegraphs, Government Telephone, Dominion Land Office, Pool Room, Moving Picture Show, Saw Mill, Livery Barns, Bakeries, Bottling Works, and many other important industries besides the many residences.

Our property is among the business houses of the town, it is close in, high and dry, and very desirable. Prices range from \$200 to \$3000 per lot. If you wish to double your money in six months you had better buy a few lots today. You had better call and see us at once, as the choice close in property is selling very rapidly. Between thirty and forty new buildings are now under construction in Grouard. Between Forty and Fifty Homesteads were filed on between Monday morning and Wednesday night all of which were as close to Grouard as they could be taken, showing the increased activity in the town during the last few weeks. Hundreds are on the way to Grouard and unless you buy today you will be too late to get the choice which you will undoubtedly be looking for later.

Our pamphlet will be ready in a day or two. It is the most complete story ever published on the Peace River Country. Call and get it.
